Journal of ALLOYS AND COMPOUNDS

Subject Index of Volume 240

Ab initio APW method
investigation of the electronic structure of the new quaternary hydride $PdSr_2LiH_5$ 107
Aluminides
structure of $Y_3TaNi_{6+x}Al_{2x}$: a filled-up substitution variant of the $BaHg_{11}$ type 266
Ammonia synthesis
room temperature catalytic ammonia synthesis over an AB_5-type intermetallic hydride L1
Ammonolysis
synthesis, structural characterisation and magnetic properties of $Gd_{14}W_4O_{33-x}N_y(0 \leq x \leq 17 \pm 2, 0 \leq y \leq 9 \pm 2)$, a new fluorite-related oxynitride 60
Amorphization
the effects of process control agents on mechanical alloying mechanisms in the Ti–Al system 193
Amorphous alloys
metastable Ti–Ni–Fe–Si alloys prepared by mechanical alloying 278
Amorphous phase
amorphization of Al–Cu–Fe quasicrystalline alloys by mechanical milling 256
Atomic penetration
the effects of process control agents on mechanical alloying mechanisms in the Ti–Al system 193
$AuCo_{2(1-x)}Sn_4$ structure
the ternary system Au–Co–Sn and the crystal structure of $AuCo_{2(1-x)}Sn_4$ 42
Au–Co–Sn system
the ternary system Au–Co–Sn and the crystal structure of $AuCo_{2(1-x)}Sn_4$ 42

Ball milling
mechanically milled Mg composites for hydrogen storage. The transition to a steady state composition 206
Barium silicon nitride
preparation and crystal structure of a new barium silicon nitride, $Ba_5Si_2N_6$ 33
Bi-based cuprates
synthesis and characterization of single Bi–O layered cuprate $(Bi,Cd)Sr_2YCu_2O_{7-\delta}$ L4
Bi-based superconducting materials
synthesis and characterization of single Bi–O layered cuprate $(Bi,Cd)Sr_2YCu_2O_{7-\delta}$ L4
Borohydride reduction
XPS, TEM and SAD investigations of nanosized $Co_xB_yH_z$ particles obtained by two different borohydride methods 186

Catalysis
room temperature catalytic ammonia synthesis over an AB_5-type intermetallic hydride L1

Ce–Mg–Y compounds
on the magnetic and valence properties of Ce–Mg–Y compounds 116
Ce–Ni–Sn system
a neutron diffraction study of $CeNi_{0.84}Sn_2$ 85
Chronopotentiometry
high-temperature electrochemical synthesis and properties of intermetallic compounds of the Ni–Sc system. Part 3. Synthesis of intermetallic compounds of the Ni–Sc system in molten salts by currentless transfer Part 4. Electrochemical synthesis of the intermetallic compounds of the Ni–Sc system 1
Composite
synthesis and electrode characteristics of the new composite alloys Mg_2Ni–x wt.% Ti_2Ni 229
Composites
mechanically milled Mg composites for hydrogen storage. The transition to a steady state composition 206
CoSn
single crystal structure refinement and high-pressure properties of CoSn 79
Crystal chemistry
crystal structures and structural relationships of $KFe_2(SeO_2OH)(SeO_3)_2$ and $SrCo_2(SeO_2OH)_2(SeO_3)_2$ 25
Crystallization
amorphization of Al–Cu–Fe quasicrystalline alloys by mechanical milling 256
Crystal structure
the ternary thorium aluminium carbides $Th_2Al_2C_3$ and $ThAl_4C_4$ 9
the crystal structure of the novel ternary silicide $Sm_4Pd_4Si_3$ 16
crystal structures and structural relationships of $KFe_2(SeO_2OH)(SeO_3)_2$ and $SrCo_2(SeO_2OH)_2(SeO_3)_2$ 25
preparation and crystal structure of a new barium silicon nitride, $Ba_5Si_2N_6$ 33
electrical properties of magnesium sodium hydrogen monophosphate: $MgNa_2H(PO_4)_2$ 70
crystal structure of $Zr_9Co_7In_{14}$ 253
structure of $Y_3TaNi_{6+x}Al_{2x}$: a filled-up substitution variant of the $BaHg_{11}$ type 266
Curie temperature
electronic state and magnetism of the rare-earth carbide GdC_x ($x \approx 0.33$) 156
Currentless transfer
high-temperature electrochemical synthesis and properties of intermetallic compounds of the Ni–Sc system. Part 3. Synthesis of intermetallic compounds of the Ni–Sc system in molten salts by currentless transfer Part 4. Electrochemical synthesis of the intermetallic compounds of the Ni–Sc system 1

Elsevier Science S.A.

DLS modelling
crystal structures and structural relationships of $KFe_2(SeO_2OH)(SeO_3)_3$ and $SrCo_2(SeO_2OH)_2(SeO_3)_2$ 25
DV-Xα method
electronic state and magnetism of the rare-earth carbide GdC_x ($x \approx 0.33$) 156

Electrochemical synthesis
high-temperature electrochemical synthesis and properties of intermetallic compounds of the Ni–Sc system. Part 3. Synthesis of intermetallic compounds of the Ni–Sc system in molten salts by currentless transfer Part 4. Electrochemical synthesis of the intermetallic compounds of the Ni–Sc system 1
Electron diffraction
synthesis, structural characterisation and magnetic properties of $Gd_{14}W_4O_{33-x}N_y$ ($0 \leq x \leq 17 \pm 2$, $0 \leq y \leq 9 \pm 2$), a new fluorite-related oxynitride 60
Electron localization function
single crystal structure refinement and high-pressure properties of CoSn 79
Electron spin resonance
ESR bottleneck effect in dilute $Gd_{1-x}La_xT_2Si_2$ (T = Cu, Ni) systems 88
Electronic density of states
ESR bottleneck effect in dilute $Gd_{1-x}La_xT_2Si_2$ (T = Cu, Ni) systems 88
Electronic structure
investigation of the electronic structure of the new quaternary hydride $PdSr_2LiH_5$ 107
pressure induced magnetic phase transition in Fe_3Pt 124
Enthalpy change
effect of alloy composition on enthalpy and entropy changes of hydride formation for stoichiometric and nonstoichiometric hydrogen storage alloys 76
Entropy change
effect of alloy composition on enthalpy and entropy changes of hydride formation for stoichiometric and nonstoichiometric hydrogen storage alloys 76
Exchange interactions
magnetocrystalline anisotropy and exchange interactions in the novel $R_3(Fe, V)_{29}$ compounds (R = Y, Nd, Sm) 101

Fe-based alloys
pressure induced magnetic phase transition in Fe_3Pt 124
Fe doping
relaxational behaviour and spin freezing in ferrates with iron in a pyramidal oxygen coordination 170

Gadolinium carbide
electronic state and magnetism of the rare-earth carbide GdC_x ($x \approx 0.33$) 156
Gd–W oxynitrides
synthesis, structural characterisation and magnetic properties of $Gd_{14}W_4O_{33-x}N_y$ ($0 \leq x \leq 17 \pm 2$, $0 \leq y \leq 9 \pm 2$), a new fluorite-related oxynitride 60

Hard magnetic materials
magnetocrystalline anisotropy and exchange interactions in the novel $R_3(Fe, V)_{29}$ compounds (R = Y, Nd, Sm) 101
Heat treatment
structure and magnetic properties of mechanically milled $Nd_{2x}Fe_{100-3x}B_x$ ($x = 2$–6) 200
Heavy fermion
new clues for understanding the magnetic behavior of UPt_3 96
Heteronuclear complexes
preparation and structural characterization of perovskite-type $La_xLn''_{1-x}CoO_3$ by the thermal decomposition of heteronuclear complexes, $La_xLn''_{1-x}[Co(CN)_6]\cdot nH_2O$ ($Ln'' = Sm$ and Ho) 51
Hexacyano complexes
preparation and structural characterization of perovskite-type $La_xLn''_{1-x}CoO_3$ by the thermal decomposition of heteronuclear complexes, $La_xLn''_{1-x}[Co(CN)_6]\cdot nH_2O$ ($Ln'' = Sm$ and Ho) 51
High pressure
single crystal structure refinement and high-pressure properties of CoSn 79
pressure induced magnetic phase transition in Fe_3Pt 124
High resolution neutron diffraction
a neutron diffraction study of $CeNi_{0.84}Sn_2$ 85
Hydrogen absorption
mechanically milled Mg composites for hydrogen storage. The transition to a steady state composition 206
Hydrogen diffusion
metastable Ti–Ni–Fe–Si alloys prepared by mechanical alloying 278
Hydrogen sorption
hydrogen storage properties of $TiMn_2$-based alloys 214
hydrogen-induced phase separation in Pd–Rh alloys 235
Hydrogen storage
hydrogen storage properties of $TiMn_2$-based alloys 214
Hydrogen storage alloy
effect of alloy composition on enthalpy and entropy changes of hydride formation for stoichiometric and nonstoichiometric hydrogen storage alloys 76
synthesis and electrode characteristics of the new composite alloys Mg_2Ni–x wt.% Ti_2Ni 229
Hydrolysis of carbides
the ternary thorium aluminium carbides $Th_2Al_2C_3$ and $ThAl_4C_4$ 9

Ideal Curie paramagnet
the ternary system Au–Co–Sn and the crystal structure of $AuCo_{2(1-\alpha)}Sn_4$ 42
Impedance spectroscopy
electrical properties of magnesium sodium hydrogen monophosphate: $MgNa_3H(PO_4)_2$ 70
Intermetallic
a cubic $AuBe_5$-type $YbCu_5$ phase with trivalent Yb ion 261
Intermetallic compound
single crystal structure refinement and high-pressure properties of CoSn 79
crystal structure of $Zr_9Co_7In_{14}$ 253
Intermetallic compounds
high-temperature electrochemical synthesis and properties of intermetallic compounds of the Ni–Sc system. Part 3. Synthesis of intermetallic compounds of the Ni–Sc system in molten salts by currentless transfer Part 4. Electrochemical synthesis of the intermetallic compounds of the Ni–Sc system 1
a neutron diffraction study of $CeNi_{0.84}Sn_2$ 85
structural and magnetic properties of $Nd_3(Fe,Ti)_{29}C_x$ carbide 134

Intermetallic rare-earth compounds
structure of $Y_3TaNi_{6+x}Al_{26}$: a filled-up substitution variant of the $BaHg_{11}$ type 266
Interstitial carbide
structural and magnetic properties of $Nd_3(Fe,Ti)_{29}C_x$ carbide 134
Interstitial carbides
the ternary thorium aluminium carbides $Th_2Al_2C_3$ and $ThAl_4C_4$ 9
Ionic conduction
electrical properties of magnesium sodium hydrogen monophosphate: $MgNa_3H(PO_4)_2$ I 70
IR
electrical properties of magnesium sodium hydrogen monophosphate: $MgNa_3H(PO_4)_2$ I 70
Isothermal section
study of the interaction of Pt and Rh with Nb or Ta 249

$KFe_2(SeO_2OH)(SeO_3)_3$
crystal structures and structural relationships of $KFe_2(SeO_2OH)(SeO_3)_3$ and $SrCo_2(SeO_2OH)_2(SeO_3)_2$ 25
Kinetics
mechanically milled Mg composites for hydrogen storage. The transition to a steady state composition 206

La–Ni alloys
room temperature catalytic ammonia synthesis over an AB_5-type intermetallic hydride L1
Lanthanum cobalt oxides
preparation and structural characterization of perovskite-type $La_xLn^{\circ}_{1-x}CoO_3$ by the thermal decomposition of heteronuclear complexes, $La_xLn^{\circ}_{1-x}[Co(CN)_6]\cdot nH_2O$ (Ln° = Sm and Ho) 51
Laser pulse heating
experimental measurement of pre-melting and melting of thorium dioxide 179
Laves phase
improvement of the electrochemical activity of Zr–Ni–Cr Laves phase hydride electrodes by secondary phase precipitation 219
Low temperature
new clues for understanding the magnetic behavior of UPt_3 96
Low-temperature X-ray measurements
Na_3As revisited II. Space group confirmation and structure refinement at 150, 210 and 240 K 19

Magnesium sodium phosphate
electrical properties of magnesium sodium hydrogen monophosphate: $MgNa_3H(PO_4)_2$ I 70
Magnetic anisotropy
structural and magnetic properties of $Nd_3(Fe,Ti)_{29}C_x$ carbide 134
Magnetic ordering
magnetic properties of R_2CoGa_3 (R = rare earth) compounds 151
Magnetic phase transition
pressure induced magnetic phase transition in Fe_3Pt 124
Magnetic properties
crystal structure of the uranium monosilicide USi 128
magnetic ordering in ternary RMn_2Ge_2 compounds (R = Tb, Ho, Er, Tm, Lu) from neutron diffraction study 139
magnetic ordering in HoCoSi and TbCoGe 164
Magnetic structure
magnetic ordering in HoCoSi and TbCoGe 164
Magnetic structure determination
magnetic ordering in ternary RMn_2Ge_2 compounds (R = Tb, Ho, Er, Tm, Lu) from neutron diffraction study 139
Magnetic susceptibility
synthesis, structural characterisation and magnetic properties of $Gd_{14}W_xO_{33-x}N_y$ ($0 \leq x \leq 17 \pm 2$, $0 \leq y \leq 9 \pm 2$), a new fluorite-related oxynitride 60
new clues for understanding the magnetic behavior of UPt_3 96
Magnetism
on the magnetic and valence properties of Ce–Mg–Y compounds 116
Magnetization
electronic state and magnetism of the rare-earth carbide GdC_x ($x \approx 0.33$) 156
Magnetization process
magnetic properties of R_2CoGa_3 (R = rare earth) compounds 151
Magnetocrystalline anisotropy
magnetocrystalline anisotropy and exchange interactions in the novel $R_2(Fe,V)_{29}$ compounds (R = Y, Nd, Sm) 101
Mechanical alloying
the effects of process control agents on mechanical alloying mechanisms in the Ti–Al system 193
metastable Ti–Ni–Fe–Si alloys prepared by mechanical alloying 278
Mechanical milling
amorphization of Al–Cu–Fe quasicrystalline alloys by mechanical milling 256
Metal hydrides
mechanically milled Mg composites for hydrogen storage. The transition to a steady state composition 206
hydrogen storage properties of $TiMn_2$-based alloys 214
improvement of the electrochemical activity of Zr–Ni–Cr Laves phase hydride electrodes by secondary phase precipitation 219
Mg–Ni
synthesis and electrode characteristics of the new composite alloys Mg_2Ni–x wt.%Ti_2Ni 229
Milling
structure and magnetic properties of mechanically milled $Nd_{2x}Fe_{100-3x}B_x$ (x = 2–6) 200
Mischmetal
room temperature catalytic ammonia synthesis over an AB_5-type intermetallic hydride L1
Molecular orbital calculation
electronic state and magnetism of the rare-earth carbide GdC_x ($x \approx 0.33$) 156
Molten salts
high-temperature electrochemical synthesis and properties of intermetallic compounds of the Ni–Sc system. Part 3. Synthesis of intermetallic compounds of the Ni–Sc system in molten salts by currentless transfer Part 4. Electrochemical synthesis of the intermetallic compounds of the Ni–Sc system 1
Monoclinic lattice
the crystal structure of the novel ternary silicide $Sm_4Pd_4Si_3$ 16

Mössbauer spectroscopy
structural and magnetic properties of $Nd_3(Fe,Ti)_{29}C_x$ carbide 134
relaxational behaviour and spin freezing in ferrates with iron in a pyramidal oxygen coordination 170

Na flux
preparation and crystal structure of a new barium silicon nitride, $Ba_5Si_2N_6$ 33
Nanocrystalline materials
structure and magnetic properties of mechanically milled $Nd_{2x}Fe_{100-3x}B_x$ ($x = 2$–6) 200
Nanosized particles
XPS, TEM and SAD investigations of nanosized $Co_xB_yH_z$ particles obtained by two different borohydride methods 186
Nd–Fe–B
structure and magnetic properties of mechanically milled $Nd_{2x}Fe_{100-3x}B_x$ ($x = 2$–6) 200
Negative electrode
synthesis and electrode characteristics of the new composite alloys Mg_2Ni–x wt.%Ti_2Ni 229
Neutron diffraction
magnetic ordering in ternary RMn_2Ge_2 compounds (R = Tb, Ho, Er, Tm, Lu) from neutron diffraction study 139
magnetic ordering in HoCoSi and TbCoGe 164
Nickel
high-temperature electrochemical synthesis and properties of intermetallic compounds of the Ni–Sc system. Part 3. Synthesis of intermetallic compounds of the Ni–Sc system in molten salts by currentless transfer Part 4. Electrochemical synthesis of the intermetallic compounds of the Ni–Sc system 1
Nickel–hydride batteries
improvement of the electrochemical activity of Zr–Ni–Cr Laves phase hydride electrodes by secondary phase precipitation 219
Nitridometallate anion
preparation and crystal structure of a new barium silicon nitride, $Ba_5Si_2N_6$ 33
Nonstoichiometry
effect of alloy composition on enthalpy and entropy changes of hydride formation for stoichiometric and nonstoichiometric hydrogen storage alloys 76

Palladium
the crystal structure of the novel ternary silicide $Sm_4Pd_4Si_3$ 16
Pb doping
relaxational behaviour and spin freezing in ferrates with iron in a pyramidal oxygen coordination 170
PCA
the effects of process control agents on mechanical alloying mechanisms in the Ti–Al system 193
Pd–Rh alloys
hydrogen-induced phase separation in Pd–Rh alloys 235
Permanent magnets
structure and magnetic properties of mechanically milled $Nd_{2x}Fe_{100-3x}B_x$ ($x = 2$–6) 200
Perovskite-type oxides
preparation and structural characterization of perovskite-type $La_xLn'_{1-x}CoO_3$ by the thermal decomposition of heteronuclear complexes, $La_xLn'_{1-x}[Co(CN)_6]\cdot nH_2O$ (Ln' = Sm and Ho) 51
Phase equilibria
study of the interaction of Pt and Rh with Nb or Ta 249
phase diagrams and thermodynamic properties of rare earth–bismuth systems 272
Phase relationships
experimental measurement of pre-melting and melting of thorium dioxide 179
Phase separation
hydrogen-induced phase separation in Pd–Rh alloys 235
Polytypism
study of the interaction of Pt and Rh with Nb or Ta 249
Pre-melting transition
experimental measurement of pre-melting and melting of thorium dioxide 179
Pressure–composition isotherm
effect of alloy composition on enthalpy and entropy changes of hydride formation for stoichiometric and nonstoichiometric hydrogen storage alloys 76
Pressure–composition isotherms
hydrogen storage properties of $TiMn_2$-based alloys 214
hydrogen-induced phase separation in Pd–Rh alloys 235
Pt–Rh–Nb phase diagram
study of the interaction of Pt and Rh with Nb or Ta 249
Pt–Rh–Ta phase diagram
study of the interaction of Pt and Rh with Nb or Ta 249

Quasicrystalline alloy
amorphization of Al–Cu–Fe quasicrystalline alloys by mechanical milling 256
Quasi-crystals
metastable Ti–Ni–Fe–Si alloys prepared by mechanical alloying 278
Quaternary mixed alkali–alkaline earth transition metal hydride
investigation of the electronic structure of the new quaternary hydride $PdSr_2LiH_5$ 107

Raman spectroscopy
electrical properties of magnesium sodium hydrogen monophosphate: $MgNa_2H(PO_4)_2$ 70
Rare earth–bismuth compounds
phase diagrams and thermodynamic properties of rare earth–bismuth systems 272
Rare earth–bismuth systems
phase diagrams and thermodynamic properties of rare earth–bismuth systems 272
Rare-earth–cobalt gallides
magnetic properties of R_2CoGa_3 (R = rare earth) compounds 151
Rare earth cobalt germanide
magnetic ordering in HoCoSi and TbCoGe 164
Rare earth compounds
a neutron diffraction study of $CeNi_{0.84}Sn_2$ 85
structural and magnetic properties of $Nd_3(Fe,Ti)_{29}C_x$ carbide 134
Rare earth intermetallic compounds
ESR bottleneck effect in dilute $Gd_{1-x}La_xT_2Si_2$ (T = Cu, Ni) systems 88

Rare earth manganese germanides
magnetic ordering in ternary RMn_2Ge_2 compounds (R = Tb, Ho, Er, Tm, Lu) from neutron diffraction study 139
Refinement strategies
Na_3As revisited II. Space group confirmation and structure refinement at 150, 210 and 240 K 19
Relation to $Ni_{3+x}Sn_4$
the ternary system Au–Co–Sn and the crystal structure of $AuCo_{2(1-\alpha)}Sn_4$ 42
Remanence enhancement
structure and magnetic properties of mechanically milled $Nd_{2x}Fe_{100-3x}B_x$ (x = 2–6) 200
Rietveld refinement
synthesis, structural characterisation and magnetic properties of $Gd_{14}W_4O_{33-x}N_y$ ($0 \leqslant x \leqslant 17 \pm 2$, $0 \leqslant y \leqslant 9 \pm 2$), a new fluorite-related oxynitride 60
Rietveld refinements
on the magnetic and valence properties of Ce–Mg–Y compounds 116

Samarium
the crystal structure of the novel ternary silicide $Sm_4Pd_4Si_3$ 16
Scandium
high-temperature electrochemical synthesis and properties of intermetallic compounds of the Ni–Sc system. Part 3. Synthesis of intermetallic compounds of the Ni–Sc system in molten salts by currentless transfer Part 4. Electrochemical synthesis of the intermetallic compounds of the Ni–Sc system 1
Secondary battery
synthesis and electrode characteristics of the new composite alloys Mg_2Ni–$x$wt.%Ti_2Ni 229
Secondary phases
improvement of the electrochemical activity of Zr–Ni–Cr Laves phase hydride electrodes by secondary phase precipitation 219
Semiconductor
synthesis and characterization of single Bi–O layered cuprate $(Bi,Cd)Sr_2YCu_2O_{7-\delta}$ L4
Silicon
the crystal structure of the novel ternary silicide $Sm_4Pd_4Si_3$ 16
Single crystal
preparation and crystal structure of a new barium silicon nitride, $Ba_3Si_2N_6$ 33
single crystal structure refinement and high-pressure properties of CoSn 79
Solid solutions
on the magnetic and valence properties of Ce–Mg–Y compounds 116
Space group confirmation
Na_3As revisited II. Space group confirmation and structure refinement at 150, 210 and 240 K 19
Specific heat
new clues for understanding the magnetic behavior of UPt_3 96
Spin fluctuations
new clues for understanding the magnetic behavior of UPt_3 96
Spin glass behaviour
relaxational behaviour and spin freezing in ferrates with iron in a pyramidal oxygen coordination 170
$SrCo_2(SeO_2OH)_2(SeO_3)_2$
crystal structures and structural relationships of $KFe_2(SeO_2OH)(SeO_3)_2$ and $SrCo_2(SeO_2OH)_2(SeO_3)_2$ 25
Stoichiometry
experimental measurement of pre-melting and melting of thorium dioxide 179
Structure
a cubic $AuBe_5$-type $YbCu_5$ phase with trivalent Yb ion 261
Structure determination
synthesis and characterization of single Bi–O layered cuprate $(Bi,Cd)Sr_2YCu_2O_{7-\delta}$ L4
single crystal structure refinement and high-pressure properties of CoSn 79
crystal structure of the uranium monosilicide USi 128
Structure refinement
Na_3As revisited II. Space group confirmation and structure refinement at 150, 210 and 240 K 19
Superconducting cuprates
relaxational behaviour and spin freezing in ferrates with iron in a pyramidal oxygen coordination 170
Susceptibility
a cubic $AuBe_5$-type $YbCu_5$ phase with trivalent Yb ion 261
Synthesis
synthesis and structure of $TlCuTiTe_3$ 37
phase diagrams and thermodynamic properties of rare earth–bismuth systems 272

Ternary rare earth cobalt silicide
magnetic ordering in HoCoSi and TbCoGe 164
Ternary rare earth compounds
the crystal structure of the novel ternary silicide $Sm_4Pd_4Si_3$ 16
Ternary rare earth iron compounds
magnetocrystalline anisotropy and exchange interactions in the novel $R_3(Fe,V)_{29}$ compounds (R = Y, Nd, Sm) 101
Tetragonal Bi-1212 compounds
synthesis and characterization of single Bi–O layered cuprate $(Bi,Cd)Sr_2YCu_2O_{7-\delta}$ L4
Thoria
experimental measurement of pre-melting and melting of thorium dioxide 179
Thorium aluminium carbides
the ternary thorium aluminium carbides $Th_2Al_2C_3$ and $ThAl_4C_4$ 9
Ti–Al
the effects of process control agents on mechanical alloying mechanisms in the Ti–Al system 193
Ti–Ni
synthesis and electrode characteristics of the new composite alloys Mg_2Ni–$x$wt.%Ti_2Ni 229
$TlCuTiTe_3$
synthesis and structure of $TlCuTiTe_3$ 37

U compounds
new clues for understanding the magnetic behavior of UPt_3 96
Uranium monosilicide
crystal structure of the uranium monosilicide USi 128

Valence state
a cubic $AuBe_5$-type $YbCu_5$ phase with trivalent Yb ion 261

XPS
XPS, TEM and SAD investigations of nanosized $Co_xB_yH_z$ particles obtained by two different borohydride methods 186
X-ray absorption
on the magnetic and valence properties of Ce–Mg–Y compounds 116
X-ray crystallography
synthesis and structure of $TlCuTiTe_3$ 37

XRD
XPS, TEM and SAD investigations of nanosized $Co_xB_yH_z$ particles obtained by two different borohydride methods 186

$YbCu_5$
a cubic $AuBe_5$-type $YbCu_5$ phase with trivalent Yb ion 261
Y–Ta–Ni–Al compound
structure of $Y_3TaNi_{6+x}Al_{20}$: a filled-up substitution variant of the $BaHg_{11}$ type 266

Zr–Co–In alloy
crystal structure of $Zr_9Co_7In_{14}$ 253
